

**Job Title: Senior Developer, UX Designer / Front-End**

**Job Purpose**

ICE Data Services team is looking for a hands-on UX Designer and front-end Senior Developer to drive the design of our web application. Ideal candidates can work with business and turning ideas and requirements into technical specs, development and testing of new features, bug fixes, and building and delivering exciting products with latest technologies.

In addition, as front-end Developer, you will contribute to feature development, product delivery, provide technical support, and help improve best engineering practices. You will work closely with architects, product and testing team in a distributed yet highly collaborated environment.

**Responsibilities**

- Consult with key stakeholders to understand goals, moderate discussions to converge to desired set of functionality.
- Create low- and high-fidelity design concepts to drive development and align expectations with project stakeholders.
- Design, develop and help support internal and client-facing financial applications
- Focus on the priorities in order to deliver the required task on time with high quality
- Lead requirement gathering and use case discussions with business.
- Participate in the full software development life-cycle

**Knowledge and Experience**

**BASIC QUALIFICATIONS:**

- The ideal candidate must have a solid understanding of graphic design and web technology, and demonstrated proficiency with design and prototyping tools (ideally, provide examples of design and usability guidance in a portfolio)
- Must have the ability to quickly adapt to new technologies and be demonstrate willingness to keep skills and industry knowledge current.
- Demonstrate creativity, passion for user experience, and attention to detail
- 5+ years web development experience
- Strong experience of JavaScript / ES6, CSS, and HTML5.
- Familiar with Scrum and Agile development methodology and tools
- Experience in problem solving, planning, and estimating development efforts
- BA/BS in Computer Science or related technical field, or equivalent experience

**PREFERRED QUALIFICATIONS:**

- Certification in usability, visual design, or communications is a plus.
- Experience with Node, Express and Routing
- Hands-on experience with React framework, or Angular 2+
- Prior experience in Financial Service / fintech
- Experience building Enterprise Applications on Web and mobile devices
- Interested in finance and want to work for a firm that is best-in-class
